CHALLENGES FACED BY ORGANISATIONS

Understanding challenges that hinder the implementation of solutions for delivering intended outcomes are imperative to be considered.

- Despite the willingness to spend, companies are unable to automate the tax function as most ERPs do not deliver Tax Compliance Solutions
- Deployment of stand-alone, unsophisticated and outdated tools in unsecured environments
- Inconsistency in data used for various Tax filings.
- Lack of robust change management process, leading to disruption in the function when transitions occur.
- Use of multiple ERPs/Tools for data Management/ reporting, challenges a single platform to host all tax-related information, hence complicating compliance.
- Excessive time spent on manual tasks to support tax compliance requirements
